EXPERIENCE

- Aspire Systems Private Limited, Chennai.

From April 2022 to till date, I am working as a Software Testing Engineer. I am having

Good exposure in the web based Automation testing, API testing, Functional testing, Database testing and in ETL testing.

PROJECTS

1. Nurse Connect :

Role: Automation Tester

Tools Used: Postgres SQL, DBeaver, POSTMAN, Eclipse, AWS – S3, Browser Stack, Azure Dev-Ops, GIT and Jenkins.

Technologies Used : Java – Selenium, TestNG, SQL, GIT and Jenkins.

Project Description:

This is a user friendly web application developed for Gifted Health Care, to cater the needs of Nurses and Recruiters. The main objective of this product is to provide jobs for the nurses. It will be act like a medium between recruiters and nurses. Nurses will apply for the jobs based on the requirement in the app and they will be get-into the interview for the respective position.

Responsibilities:

- Collecting requirements from Business Analysts
- Analyzing and defining the test requirements
- Creating Test Plans in Azure Dev-Ops
- Designing the Test Scenarios and Test cases for the given user stories
- Reviewing the Test suites and plans of the team members
- Performing Functional Testing, API Testing, developing automation Testcases, Debugging the Testcases, ETL Testing, Mobile Testing, Ad-hoc Testing & Regression Testing.
- Reporting and Tracking the bugs based on the severity and prioritizing the defects using Azure Dev-ops
- Monitoring the API flows and performances
- Mobile browser testing using Browser Stack tool
- Defect Validation
- Involvement in Client Demos

2. M-Files

Role: Automation Tester

Tools Used: Eclipse, Azure Dev-Ops, MS SQL Server

Technologies Used : Java – Selenium, TestNG, SQL, GIT and Jenkins.

Project Description:

M-Files is a Content management system. The M-Files metadata-driven document management platform enables knowledge workers to instantly find the right information in any context, automate business processes, and enforce information control. This provides businesses with a competitive

advantage and substantial ROI as they deliver better customer experiences and higher-quality work with lower risk. Our team's core responsibilities include automating manual test cases, executing tests for pre release and release builds, analyzing reports, and reporting bugs in the Azure VSTS.

Responsibilities:

- Collecting requirements from Business Architect
- Analyzing test requirements and picking test case to automate
- Automating Test cases and creating test data for web automation
- Handling Pre-release and Release Executions of Quick Regression Testing, Compatibility Testing for desktop application using Test Execute tool
- Performing Smoke Testing on a daily basis
- Analyzing the execution result and finding the root cause of failure
- Supporting in script fix for team members
- Giving in Client Demos
- Reporting and Tracking the bugs based on the severity and Prioritizing the defects using Azure Dev-Ops.
- Defect Validation
- Involvement in Client Demos

3. GEMS – One Platform :

Role: Functional Tester

Tools Used: POSTMAN, JIRA, Test link, MS SQL.

Technologies Used : SQL

Project Description:

This is a user friendly web application developed for GEMS Education, to improve and revamp their existing products such as Phoenix RISE & Phoenix LMS to cater the needs of Students, Teachers and Parents. Mobile app was also developed for the majority of the features.

Responsibilities:

- Collecting requirements from Business Analysts
- Analyzing and defining the test requirements
- Designing the Test Scenarios and Test cases for the given user stories
- Performing Functional Testing, Smoke Testing, Ad-hoc Testing, Performance Testing & Regression Testing.
- Performing API testing using the POSTMAN API tool
- Performing DB testing using MS SQL
- Reporting and tracking the bugs based on the severity and prioritizing the defects using JIRA
- Defect Validation

Certifications : ISTQB , Certification ID : CTFL-134744 India
